WM-Nano

TABLETOP WRAPPER
with PRINTER
and COLOR TOUCHSCREEN

A slimmer, trimmer auto-wrapper

Until recently there's been little middle ground in wrapping equipment. Retailers could choose a small, manual station or a room-sized automatic machine. But now there's another choice.

Ishida's WM-Nano is currently the only auto-wrapper on the market compact and affordable enough for all retailers. At just 28 inches wide, 34 inches deep, and 28 inches high, it's a unique concept—a tabletop unit with an integrated scale and printer, offering all the benefits and features of a full-size automatic machine in a modest size and affordable price.

The WM-Nano boosts output as high as 15 packages per minute (PPM), while reducing the risk of repetitive motion injuries often caused by hand-packaging and achieving the same attractive, quality wrap every time, regardless of operator.

By reducing space requirements 50 to 70 percent over competitor models, the WM-Nano fits almost anywhere and accommodates a wide range of products and tray sizes.

Controlled by the Uni-7 price-computing scale and printer, the WM-Nano brings the same user interface right from the front counter to the back room, where operators won't have to learn another type of equipment.

Shown with options: stand, film and POP label dispenser

Standard Features

- 7-inch color LCD touch screen with backlight
- Dual-range weighing (0-15 lb x 0.005 lb/15-30 lb x 0.01 lb)
- Front-load label cassettes
- Internal wireless communications, 802.11 b/g (WEP, WPA, WPAZ)
- Ethernet communications
- Up to 99 pages of speed keys
- Adjustable touchscreen viewing angle
- 77 tactile keys
- 4 MB expandable to 2 GB
- 30+ selectable fixed bar code formats
- Compatible with third-party communication software, including Invatron's PLUM, ADC's InterScale and Droste's PCSI Manager

Options/Accessories

- SLP-5 scale management software, including label design, data back-up and remote diagnostics
- POP label dispenser
- Washdown cover
- Stainless steel stand

SLP-5
