Corresponding Scale Indicators:

Uni-3

Ishida's Uni-3 Series is the economical yet efficient hand-wrap station choice. Networking capabilities and user-friendly operation make the Uni-3 Series with remote scale base system ideal for prepack operations. The Uni-3 has two display types, multiple label formats and standard Ethernet or optional wireless connectivity.

Uni-7 RP

Ishida's Uni-7 RP delivers repeatable performance under strenuous working conditions. Flexible and functional, the Uni-7 RP with remote scale base is the perfect model to integrate with manual hand-wrapping stations.

Uni-9 RP

The compact size of Ishida's Uni-9 RP delivers space-saving efficiency when workstation capacity is at a premium. Without sacrificing size for performance, Ishida's Uni-9 RP is capable of weighing and labeling nonstandard sized products. The PC-based Uni-9 RP platform communicates with PCs via Ethernet or Wi-Fi networks. Ishida's Uni-9 RP is available in a 60 x 0.01 pound version.

IP-Ai

Ishida's IP-Ai is the ideal complement to high-volume automatic wrappers, with fast weighing and print speeds faster than 100 millimeters per second. Its front-loading feature and large, nine-inch label roll capacity keep business up and running longer. Create eye-catching labels with the ability to store and print custom graphics. From ergonomic design to high-speed performance, the IP-Ai offers the latest technology to streamline prepackaging operations.

Rice Lake Weighing Systems sells labels for every model of printer and labeler offered, with multiple sizes available. Labels can be pre-printed with standard designs and messages, such as safe handling instructions, or customized with a name, logo, tagline or special instructions.
